

Kindergarten Consonant Phoneme and Grapheme Wall

Sound walls can help students build accuracy and fluency with both decoding and encoding. They can be organized in different ways. **In addition to the CONSONANT wall, you will also need a VOWEL wall. See additional document for vowel wall cards.**

The following pages contain sound wall cards with images that match the key pictures from our phonics kits. Cards are displayed according to how they are produced in the mouth. Cards should be covered or not posted until that sound has been explicitly taught.

Additional key pictures included for the following sounds:

- /x/--fox
- Voiced /th/--feather
- /zh/--treasure
- /ng/--ring
