3. Lewis Carroll: *The Mouse's Tale*

The following example is an excerpt from Lewis Carroll's *The Mouse's Tale*, a poem appearing in the third chapter of *Alice in Wonderland*. It is a concrete poem in which the lines consist of only a couple of words, laid out in such a way that they visualise the mouse's winding tail:

“Fury said to
 a mouse, That
 he met
 in the
 house,
 ‘Let us
 both go
 to law:
I will
 prosecute
you.—
 Come, I’ll
 take no
 denial;
 We must
 have a
 trial:
 For
 really
 this
 morning
 I’ve
 nothing
 to do.’
 Said the
 mouse to
 the cur,
 ‘Such a
 trial,
 dear sir,
 With no
 jury or
 judge,
 would be
 wasting
 our breath.’
 ‘I’ll be
 judge,
 I’ll be
 jury,’
 Said
 cunning
 old Fury;
 ‘I’ll try
 the whole
 cause,
 and
 condemn
 you
 to
 death.’”

Fig. 1.

For the encoder, this specific visual layout challenges the TEI's orientation towards logical structures to some extent. In the example, the visual lines are encoded as logical lines (<l>); the

visual particularities (font size, indentation) are formalised as values of a **@rend** attribute on each line. Of course, any value system is allowed for the **@rend** attribute; it's up to the rendition layer to decide how to interpret these values and format them on the screen / in print.

Alternatively, the lines could have been treated on a more logical level, spanning multiple physical lines. The line breaks then could have been encoded with **<lb/>** elements, and specific visual characteristics as values for **@rend** attributes on **<seg>** elements. Since the spaces are quite significant, the TEI special purpose element **<space>** could have been used as well.
