1. The chart above was hanging up at the grocery store. Mrs. Boyd picked a 14 pound turkey, but 14 pounds was not on the chart. How could she find out how much her turkey costs using the chart above?
2. Mrs. Boyd bought a 14 pound turkey for her Thanksgiving dinner. The recipe book says that she needs to cook the turkey 10 minutes for every pound. How many minutes does she need to cook the turkey?
