

Let's try it...

Drink Mix

A glass of water weighs _____ grams.

A packet of drink mix is weighed before stirring it into the water.

The drink mix weighs _____ grams.

Predict how much you think the mixed drink will weigh after you stir in the mix.

Prediction: The mixed drink will weigh _____ grams.

Try it:

Mix the drink mix and water. Weigh the mixed drink.

Results: The mixed drink weighed _____ grams.

Describe and explain what happened in the experiment.
