

Drops of Water

Take a spoonful of the substance in each bag and place them on a paper plate. Use your senses to make observations and determine what the mystery substance is in each bag. Record your thinking. Then add drops of water to each substance. Observe and record what happens.

Mystery Substance	I think it is...	Because... <i>(use properties to describe it)</i>	When I added water...
Bag A			
Bag B			
Bag C			
Bag D			

How did the properties of the substances help you determine what the mystery substances were?
