

1. Jim measured the carpet in the classroom with his planner and then with a crayon. He got these two measurements: 25 and 12.

Which measurement was the planner and which was the crayon?

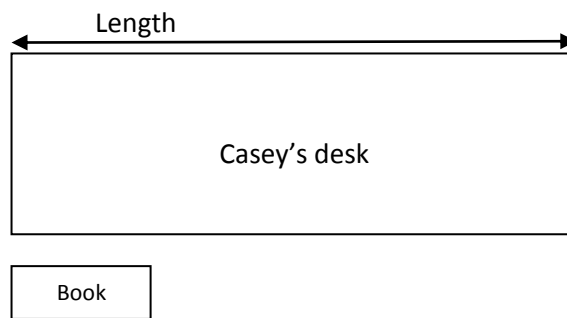

(Write crayon or planner in the blank)

25 \_\_\_\_\_

12 \_\_\_\_\_

Why were the measurements different?

2. Casey wants to find the length of her desk with one book, but her book is not as long as her desk.

Can Casey use only one book to measure her desk? Explain.
