(3:25, 5:45)

Name _____

Date _____

Jackie grew her hair out to ____ inches long to donate to locks of love. She got her hair cut and now her hair is ____ inches long. How many inches did she have cut off her hair?

(22, 13)

(24, 15)

(28, 19)

(32, 15)

The form consists of a large outer rectangle. A single horizontal line divides this rectangle into two equal vertical sections. In the top-left corner of the upper section, there is a smaller, empty rectangular box. Similarly, in the top-left corner of the lower section, there is another smaller, empty rectangular box. These boxes are intended for students to write their answers to the problem above.
